Profile

I'm a hands-on creative with a background in building large-scale props, costumes, and immersive sets for live events and commercial installations.

I combine traditional craftsmanship with digital tools to solve complex challenges and deliver bold, high-impact work.

I'm driven by collaboration and teamwork, bringing precision to every stage of the process while maintaining a safe and efficient environment.

Being fluent in Welsh has helped me connect more deeply with people and projects, especially those rooted in local culture or bilingual settings.
